

## **Barn Cats**

### **Williamson County Regional Animal Shelter**

**Barn cats are cats who prefer to live in barns and also have full access to the outdoors. They require food, water, and proper shelter.**

**This is a win-win situation! You get a cat(s) that is spayed or neutered, fully vaccinated including rabies, and dewormed. In return, we have room to take in more cats.**

**Many of the cats we receive are “feral.” These cats cannot be re-homed in a home environment. They are wild by nature and not accustomed to humans. We cannot take care of them in a shelter environment and they are euthanized if placement is not available.**

**To repay you for your kindness, these cats will catch unwelcome mice and other varmints straying into or around your barn.**

**To learn more about barn cats, please visit the shelter or call at 512-943-3322.**
